1.) Total Customers

select count(*) as total_customer from customer_churn

	total_customer
1	7043

2.) Churn Rate

SELECT COUNT(CASE WHEN Churn = 'Yes' THEN 1 END) * 100.0 / COUNT(*) AS churn_rate FROM customer_churn;

	churn_rate
1	26.536987079369

- Total Customers: **7043**
- Churn Rate: **26.54%**

👉 **Insight:**

Around **1 in 4 customers are leaving**, which is a significant retention problem.

3.) Churn by Contract

```
SELECT Contract,
    COUNT(*) AS total_customers,
    COUNT(CASE WHEN Churn = 'Yes' THEN 1 END) AS churned_customers
FROM customer_churn
GROUP BY Contract;
```

	Contract	total_customers	churned_customers
1	Month-to-month	3875	1655
2	Two year	1695	48
3	One year	1473	166

👉 Customers with **month-to-month contracts are extremely likely to churn**, while long-term contracts significantly reduce churn.

4.) Churn by Payment Method

```
SELECT PaymentMethod,
    COUNT(*) AS total,
    COUNT(CASE WHEN Churn = 'Yes' THEN 1 END) AS churned
FROM customer_churn
GROUP BY PaymentMethod;
```

	PaymentMethod	total	churned
1	Electronic check	2365	1071
2	Mailed check	1612	308
3	Bank transfer (automatic)	1544	258
4	Credit card (automatic)	1522	232

👉 Customers using **electronic checks have the highest churn rate**.

5.) Avg Monthly Charges by Churn

```
SELECT Churn,
    AVG(MonthlyCharges) AS avg_monthly_charges
FROM customer_churn
GROUP BY Churn;
```

	Churn	avg_monthly_charges
1	Yes	74.4413322632423
2	No	61.2651236953999

👉 Customers paying **higher monthly charges are more likely to churn**.

6.) Tenure Analysis

```
SELECT Churn,
    AVG(tenure) AS avg_tenure
FROM customer_churn
GROUP BY Churn;
```

	Churn	avg_tenure
1	Yes	17
2	No	37

👉 Customers who leave do so **early in their lifecycle**.

7.) Internet Service Impact

```
SELECT InternetService,
    COUNT(*) AS total,
    COUNT(CASE WHEN Churn = 'Yes' THEN 1 END) AS churned
FROM customer_churn
GROUP BY InternetService;
```

	InternetService	total	churned
1	No	1526	113
2	DSL	2421	459
3	Fiber optic	3096	1297

👉 **Fiber optic users churn the most**, despite being premium users.

8.) Senior Citizen Impact

```
SELECT SeniorCitizen,
    COUNT(*) AS total,
    COUNT(CASE WHEN Churn = 'Yes' THEN 1 END) AS churned
FROM customer_churn
GROUP BY SeniorCitizen;
```

	SeniorCitizen	total	churned
1	0	5901	1393
2	1	1142	476

👉 Senior citizens are **more likely to churn**.

9.) Tenure Groups

```
SELECT
CASE
  WHEN tenure <= 12 THEN '0-1 Year'
  WHEN tenure <= 24 THEN '1-2 Years'
  WHEN tenure <= 48 THEN '2-4 Years'
  ELSE '4+ Years'
END AS tenure_group,
COUNT(*) AS total,
COUNT(CASE WHEN Churn='Yes' THEN 1 END) AS churned
FROM customer_churn
GROUP BY
CASE
  WHEN tenure <= 12 THEN '0-1 Year'
  WHEN tenure <= 24 THEN '1-2 Years'
```

```
  WHEN tenure <= 48 THEN '2-4 Years'

  ELSE '4+ Years'

END;
```

	tenure_group	total	churned
1	1-2 Years	1024	294
2	2-4 Years	1594	325
3	0-1 Year	2186	1037
4	4+ Years	2239	213

👉 New **customers are at the highest risk of churning**.
